

Read our dashboard as a story

THE SITUATION

Metrics everywhere.

You know what each number is.

You don't know what they're saying together.

Here's my dashboard: [screenshot].

Don't describe each metric, I can see that.

Tell me what story they tell together.

What happened, and what's the likely cause?

Flag any metric moving against the others.

WHAT WE GOT

"CR dropped but AOV went up at the same time.

The issue isn't demand, it's the top of the funnel."

That kind of sentence. Not a list of numbers.
