

[USE CASE 6 / 7]

Pull our data automatically. No developer.

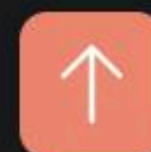

THE SITUATION

Gumroad analytics shows total downloads, total revenue, total conversion. That's it. No breakdown by product. Useless.

I want to pull data from [service] API into Google Sheets every day.
I don't know how to code.
Here's the API docs: [link].
What data can I extract? Write a script that pulls it and runs daily.

 Bypass permissions

WHAT WE GOT

Apps Script + daily trigger.
Data shows up every morning.
No CSV downloads. No manual updates.
